

Git Hands-On Lab 4 — Solution

```
git checkout master
git status

git branch GitWork
git checkout GitWork
echo "<hello>Version from GitWork branch</hello>" > hello.xml

echo "<hello>Updated on GitWork branch</hello>" > hello.xml
git status
git add hello.xml
git commit -m "Add hello.xml on GitWork branch"

git checkout master
echo "<hello>Version from master branch</hello>" > hello.xml
git add hello.xml
git commit -m "Add hello.xml on master with different content"

git log --oneline --graph --decorate --all
git diff master GitWork -- hello.xml
git difftool -t p4merge master GitWork -- hello.xml

git merge GitWork
cat hello.xml
git status

git mergetool -t p4merge
git add hello.xml
git commit -m "Merge GitWork into master, resolve hello.xml conflict"

git status
echo "*.orig" >> .gitignore
git add .gitignore
git commit -m "Ignore .orig backup files created by merge tool"

git branch -a
git branch -d GitWork
git log --oneline --graph --decorate
```
